PROACTIV activated carbon filters are extremely reliable to remove any undesirable odours in the air. They are lighter, smaller, more efficient and safer than conventional carbon filters alternatives.

PROACTIV filters use only food grade virgin coconuts activated carbon which is considered the best carbon to remove organic smell. The multilayer fleece mats are sealed air-tight in the base and cover, preventing any accidental intake of (unfiltered) air.

The innovative design of the flange and the base of **PROACTIV** filters simplify their use. They can be hanged directly from their extremity without having to surround the filter with chains or girths.
